

Muhammad Ahmed

Lahore, Punjab, Pakistan | ahmed46farooq@gmail.com | 03044139557

Profile

Game Developer with 4+ years of industry experience and a solid Computer Science background. Skilled in Unity and C#, with a strong ability to contribute across the full development cycle. Known for quick adaptation, teamwork, and problem-solving in dynamic environments.

TECHNICAL SKILLS

Game Engines & Development: Unity (2D & 3D), UI/UX Systems, Animator & Animation System, WebGL Development, Fast Prototyping & Playable Builds, Unity Job System, DOTs

Programming & Scripting: C#, Object-Oriented Programming (OOP), Game Architecture Design, Design Patterns (Singleton, Factory, Observer, etc.), SOLID Principles, DRY (Don't Repeat Yourself), Zenject (DI Framework), .Net Core

Multiplayer Development: Photon Fusion, Networking Concepts (Syncing, Input Handling, State Management), Multiplayer Architecture

Tool & SDK: Firebase, PlayFab, Photon, AdMob, Rest API, Unity In-Apps

Platforms: Android, IOS, Webgl, PC

PROJECTS

SolaVerse

Feb 2022 — Oct 2022

- Designed and implemented core architecture for a blockchain-integrated P2E game using Unity's Grid, Tile map, and Scriptable Objects.
- Built scalable systems for game flow, data persistence, and UI, enabling a dynamic player-driven economy and seamless game play experience.

XFlight Simulator

Oct 2022 — Dec 2022

- Developed an immersive flight simulation game with realistic physics and interactive cockpits for aviation enthusiasts.
- Integrated Map SDK and AR features to enable real-world terrain generation and enhanced training experiences with high visual fidelity.

G.I Joe : Wrath of Cobra

Feb 2023 — Nov 2023

- Integrated Photon Fusion to enable cross-platform multiplayer in a pre-existing single-player beat 'em up game.
- Implemented responsive input controls, client-side prediction, and efficient network object pooling.

War Tribes

Dec 2023 — Mar 2025

- Architected a scalable, maintainable RTS game using SOLID principles, event-driven systems, and Unity's Tilemap for grid-based base-building and PvP combat.
- Implemented Firebase integration, custom 2D pathfinding, and monetization systems (AdMob, IAP) to support real-time gameplay and user engagement.

EDUCATION

Bachelor of Science in Information Technology, PUCIT(Punjab University College of Information Technology), Lahore

Nov 2017 — Apr 2021

Professional Experience

Software Engineer, Geniteam, Lahore

May 2021 — Present

- Developed interactive 3D and 2D games for Android, iOS, and WebGL, enhancing user engagement.
- Collaborated on multiplayer game development, mastering concepts like syncing and state management.
- Mentored junior developers by providing code reviews, guidance on best practices, and support in learning Unity and C#.
